

SPARTA-GUARD™

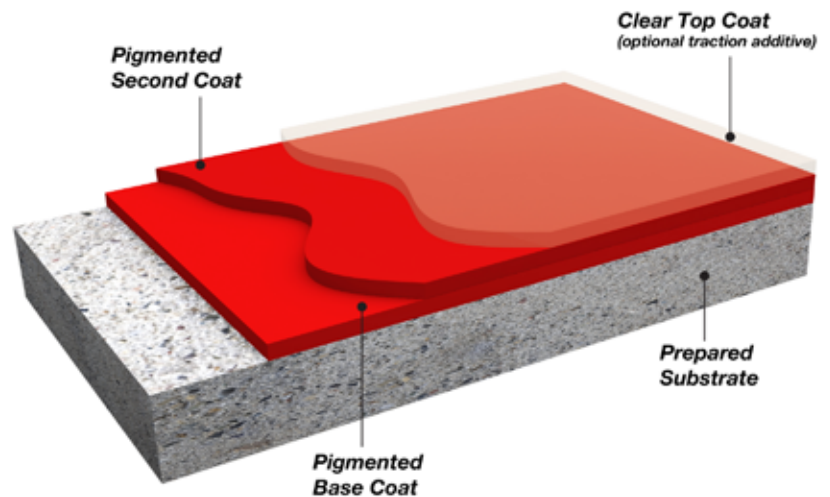

Heavy-Duty Solid-Floor Flooring Systems
by HP Spartacote®

HP Spartacote's® solid-color flooring system, Sparta-Guard™ was developed to provide a beautiful solid-color concrete flooring solution with minimal maintenance and rapid return to service. Incorporating HP Spartacote's® patented DCC® technology makes Sparta-Guard™ one of the industry's most specified systems, providing tremendous chemical resistance along with twice the adhesion of epoxies or polyurethanes. Incredibly popular where cleanliness is a must, Sparta-Guard™ prevents common chemicals such as oils, grease, gasoline, detergents or salt from penetrating a concrete substrate.

Sparta-Guard™ systems are widely used in the following applications:

- Airplane Hangars
- Hospitals
- Warehouses
- Distribution Centers
- Laboratories
- Showrooms
- Manufacturing Facilities
- Parking Decks
- Garages

Sparta-Guard™ is completely UV stable and is ideal for a variety of indoor and outdoor settings.

Available in HP Spartacote's® standard colors with both high-gloss and lo-gloss sheens available, providing a solution where light sensitivity or reflection is an issue. Surface finish can be smooth or slip resistant. This system is perfect for situations demanding a highly durable and aesthetically appealing finish with minimal downtime. As is the case with all HP Spartacote® DCC® coatings, the Sparta-Guard™ system can be installed in a matter of hours with next-day return to service.

- UV Stable
- All-climate application
- 3x more durable than epoxy
- Excellent color/gloss retention
- Lo-emitting green friendly coating
