

SPARTA-STAIN™

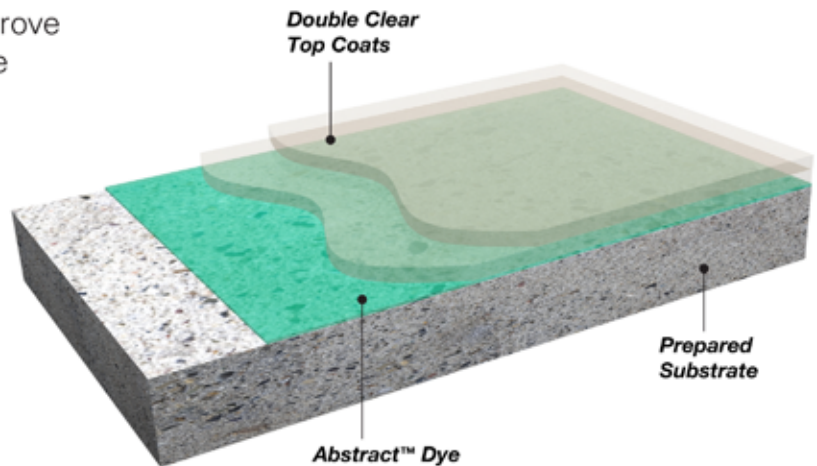

Heavy-Duty Stain Flooring Systems
by HP Spartacote®

HP Spartacote's® Sparta-Stain™ system incorporates high quality Abstract Concrete Dyes™ and HP Spartacote® Sparta-Flex® clear sealers to create a variety of brilliant decorative concrete finishes. Abstract Concrete Dyes™ are formulated to penetrate adequately prepared concrete and create variegated effects similar to reactive acid stains. This system may be applied direct to concrete, stamped or stenciled concrete, and cementitious overlays. Sparta-Stain™ allows the installer to retain maximum flexibility during application, furthering the creative potential of any decorative concrete project.

Abstract Concrete Dyes™ are specifically designed to be compatible with Sparta-Flex® Hi-Gloss and Lo-Gloss sealers.

An ideal top-coat for high traffic situations, Sparta-Flex™ clear sealers are designed to dramatically improve the appearance of underlying substrates while also providing outstanding chemical, abrasion and impact resistance. These products incorporate HP Spartacote's patented DCC polyaspartic coating technology, allowing for greater durability and long-lasting performance. Sparta-Flex® sealers allow for fast return to service with the capability for heavy foot traffic within a matter of hours, not days.

Features and Benefits:

- One-Day Installation & Next-Day Return to Service
- Up to 3x More Abrasion Resistant than Epoxy
- Low Temperature Application (down to -30° F)
- 100% UV Clear with Excellent Gloss Retention
- USDA & FDA Approved
- Walk-On in as Little as 1-2 Hours
- Lays out flat with no roller marks or bubbles
- One to Multiple Coats
- Incorporate Traction Additive as Necessary
